

Action for Sustainability Initiative

Who we are

AFOSI is a lean, technology backed local non-governmental organization addressing challenges across health, education, livelihoods, leadership and governance, Climate justice and humanitarian support. Our current flagship initiatives; Sheria ya Vijana, M.A.T.H, Youth Voices Lab and the YOMA Projects are implemented through our digital tools, including the Kiongozi Platform, the Kenya Youth Climate Hub (KYCH) and the Flare Hub startup management platform.

SDG ALIGNED IMPACT MODEL

Organizational Pillars

Our Thematic Focus

Health

Education

Youth Livelihoods

Climate Justice
& Environment

Humanitarian
Support

Leadership
and Governance

Cross-Cutting Themes

- Technology & Innovation: Through digital solutions powering youth leadership and sustainability.
- Advocacy: Educating community voices shaping inclusive policies and action.
- Gender Equality: Empowering women and marginalized groups to access opportunities, exercise their rights and lead transformative change.

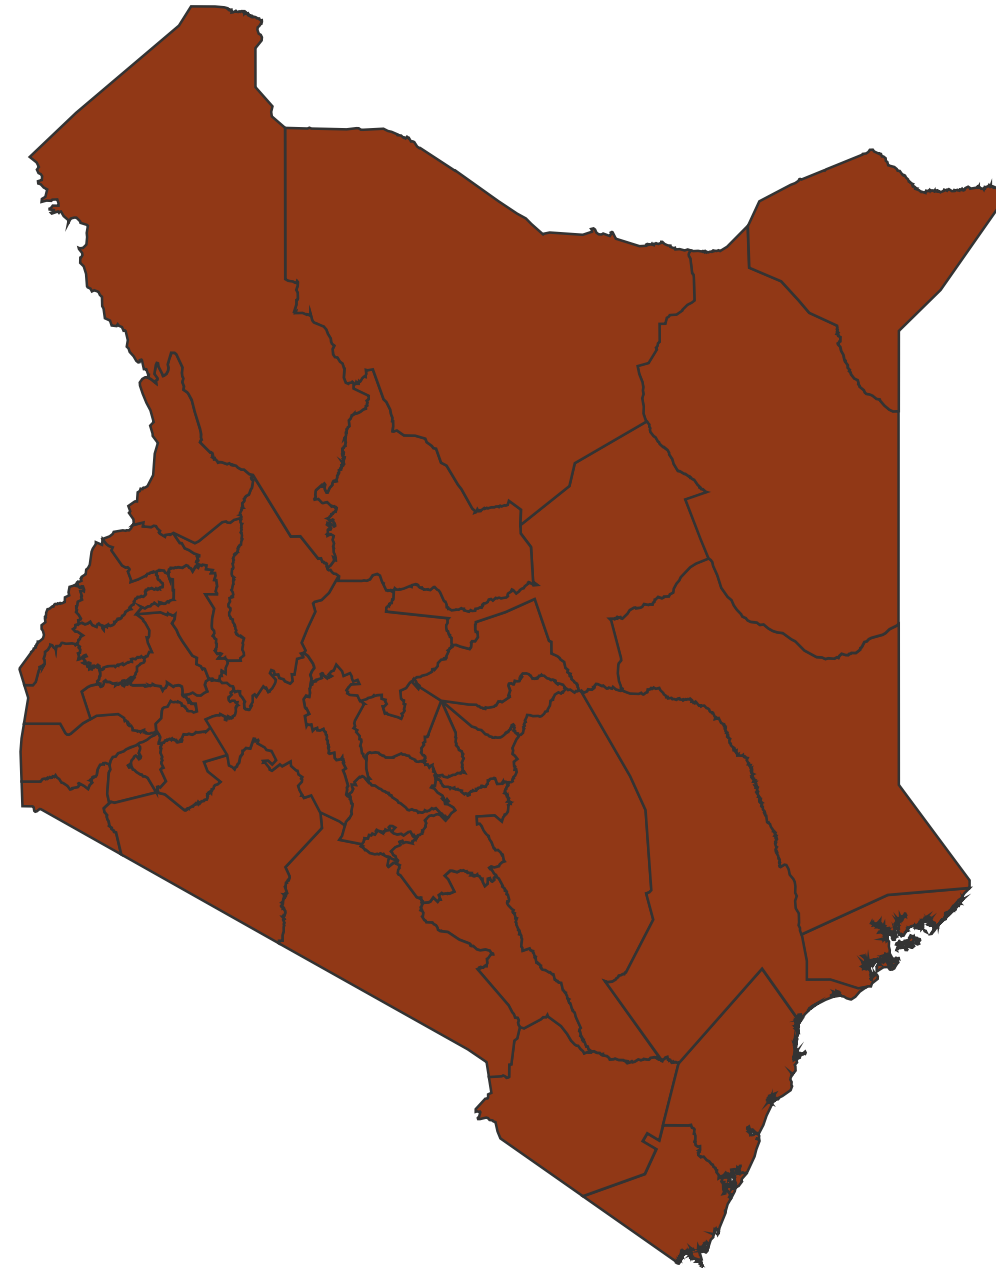

The Problem

67%

Kenyan Youth who are unemployed

40%-45%

Women facing sexual reproductive health challenges

84%

Youth who don't participate in governance and decision making

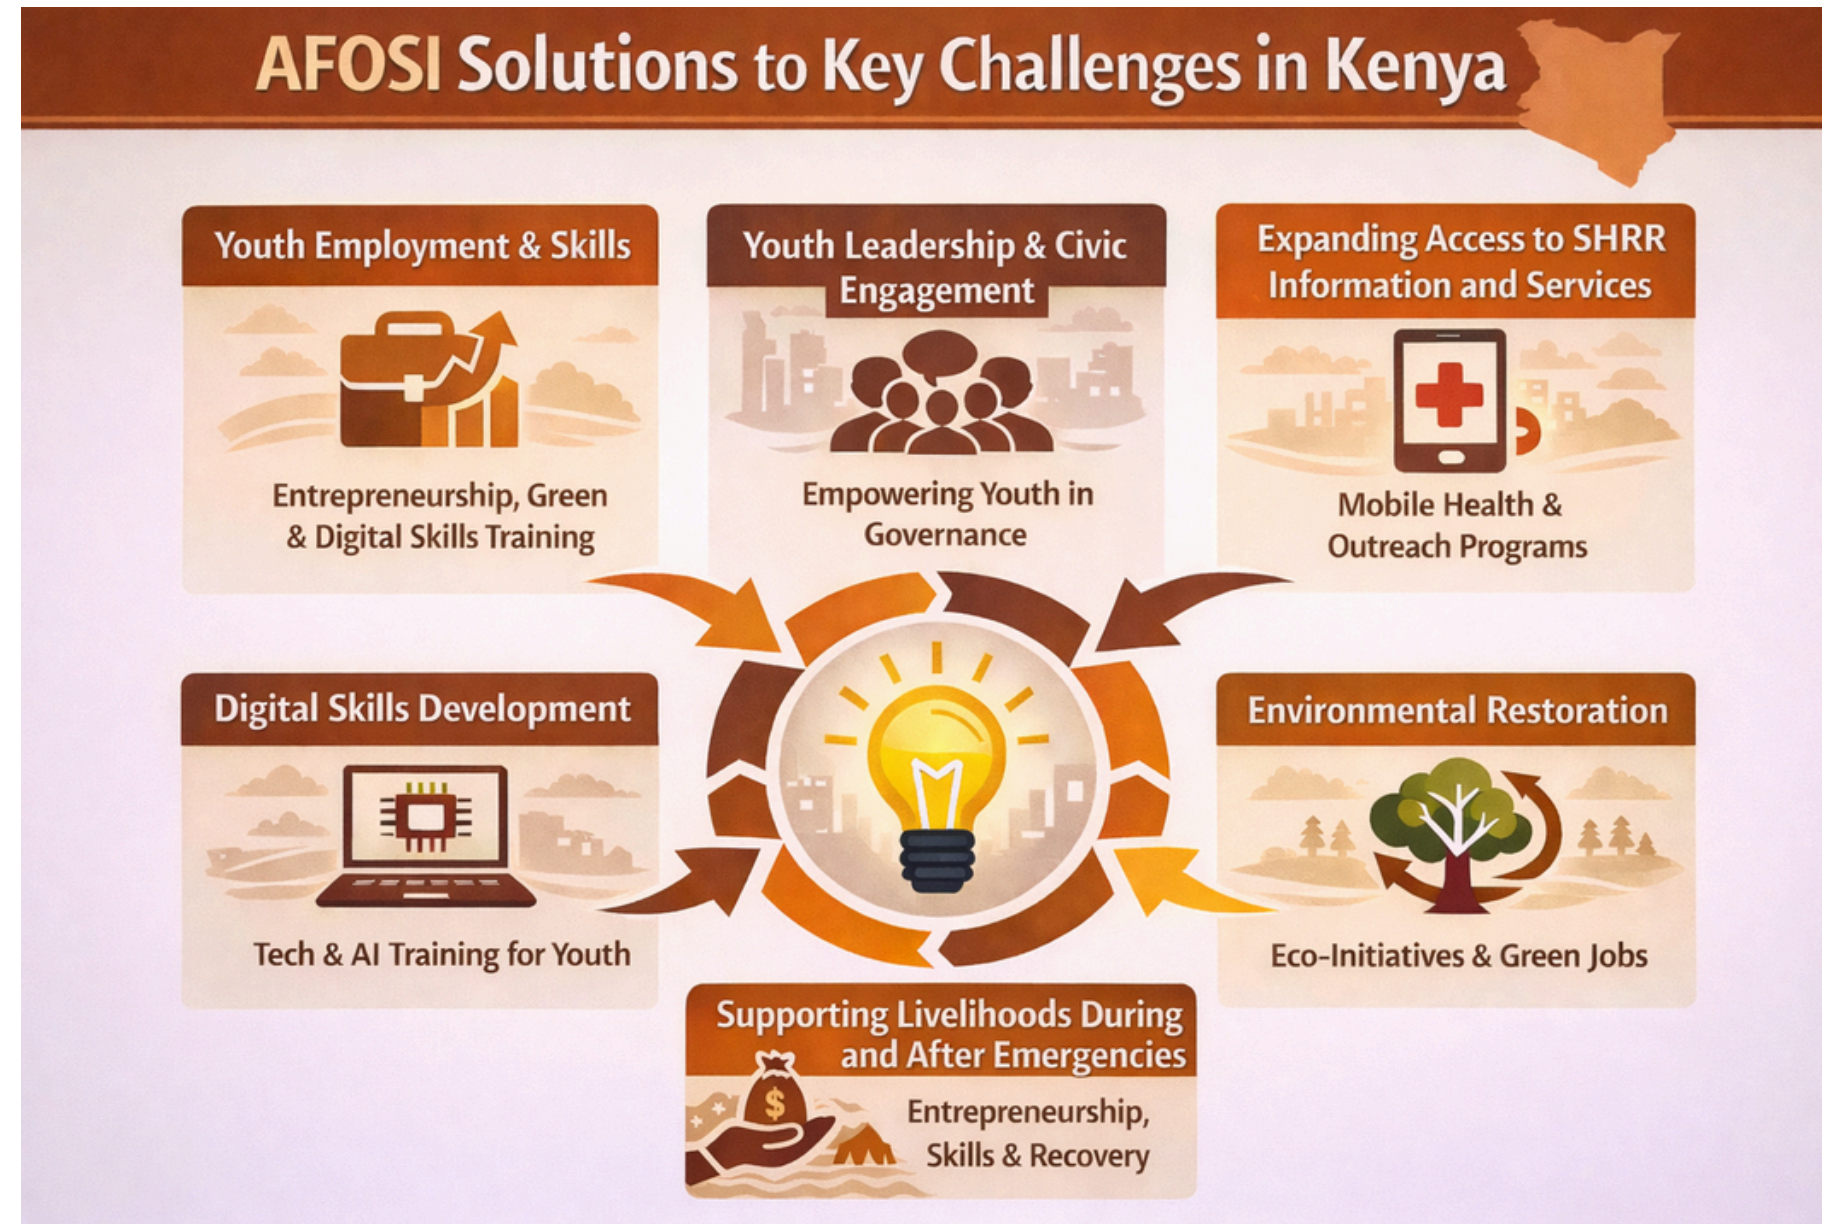

61%

Environmental pollution and ecosystem degradation.

45%

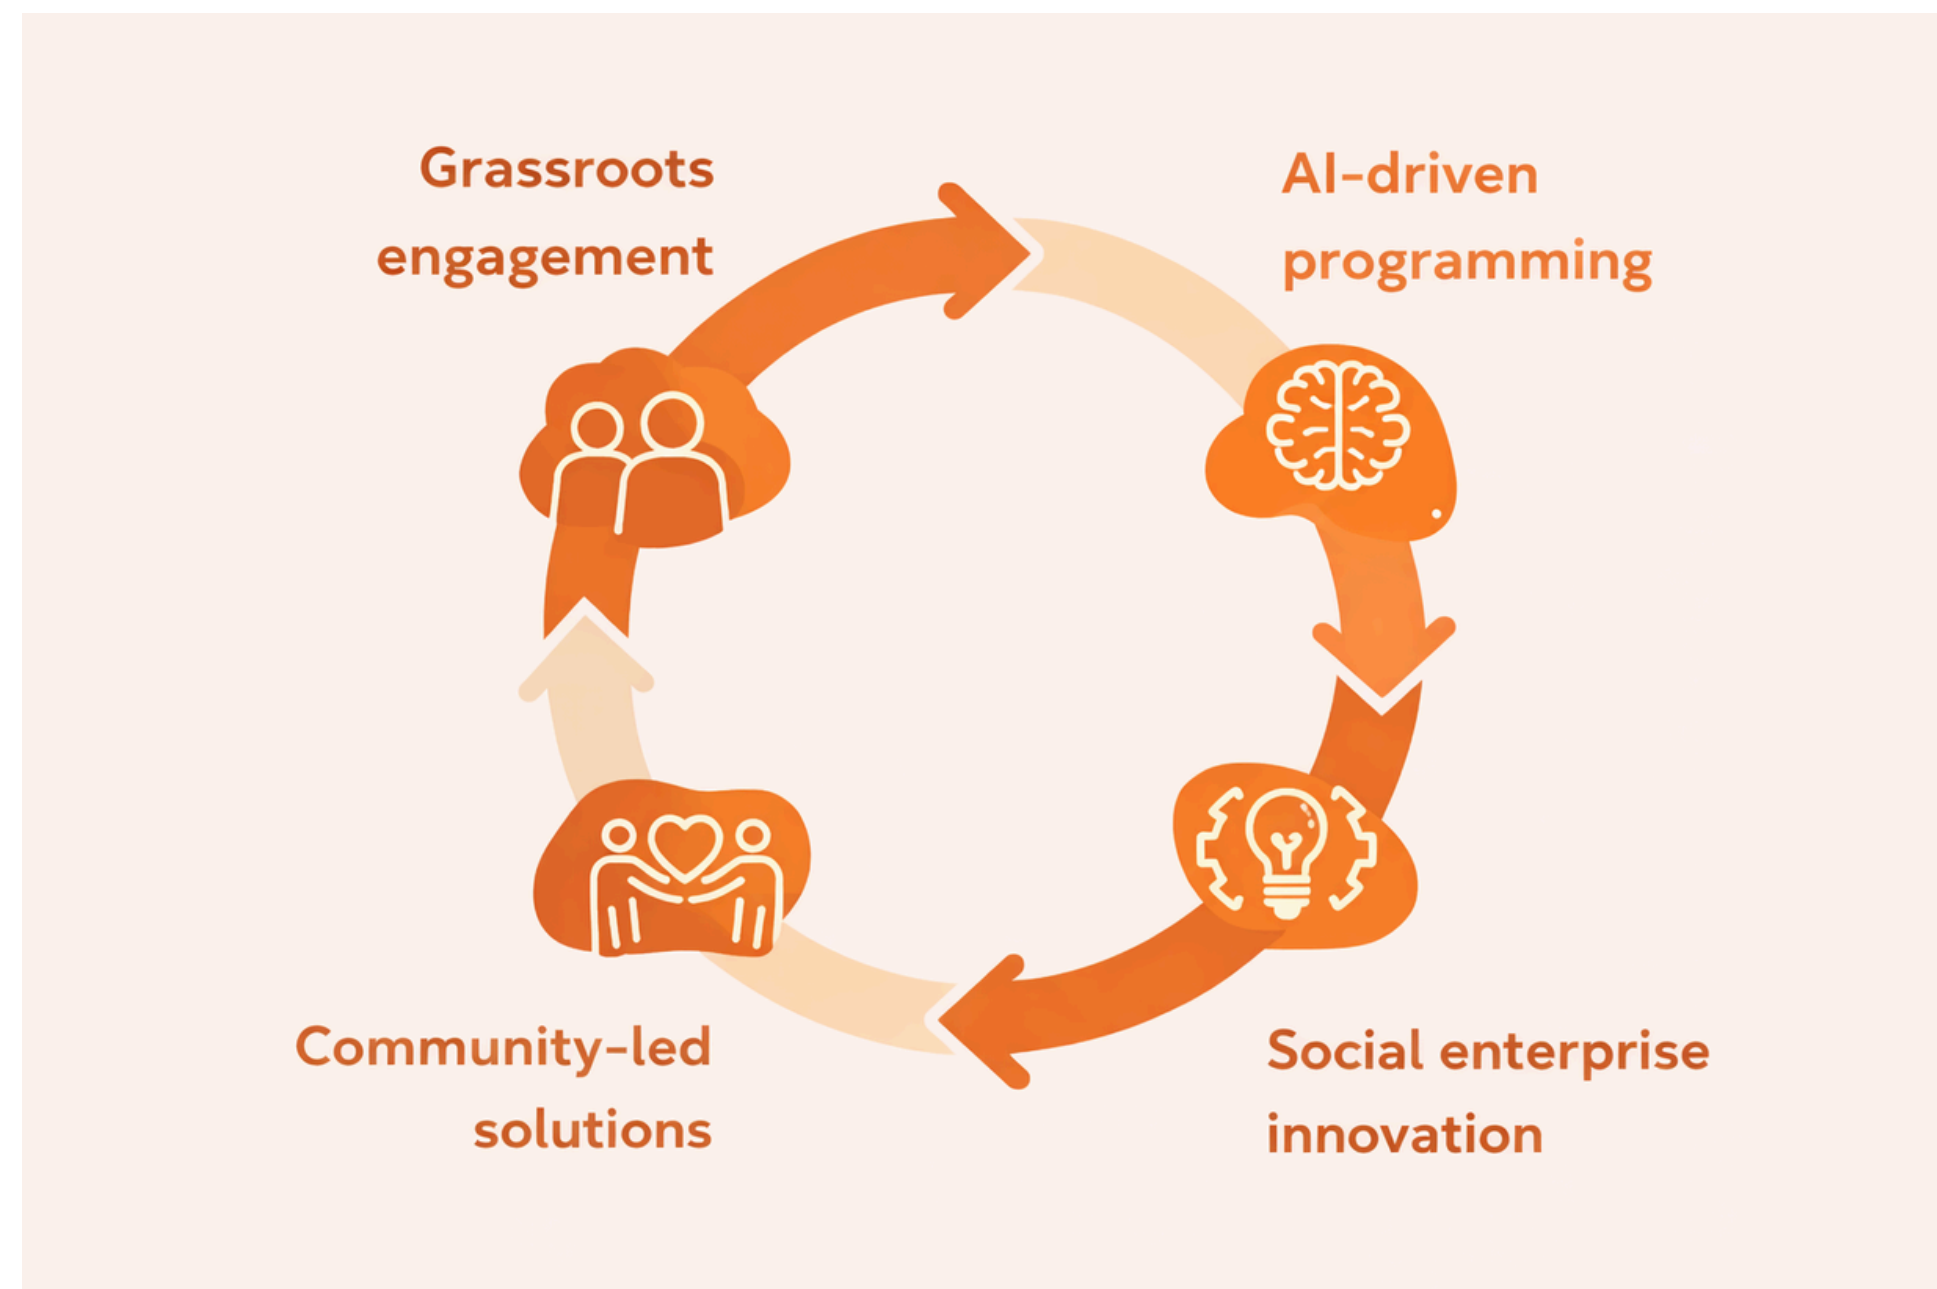

Low access to digital literacy

Solution

Our Approach

A Hybrid model for sustainable impact

Technology and Innovation

Kiongozi Platform

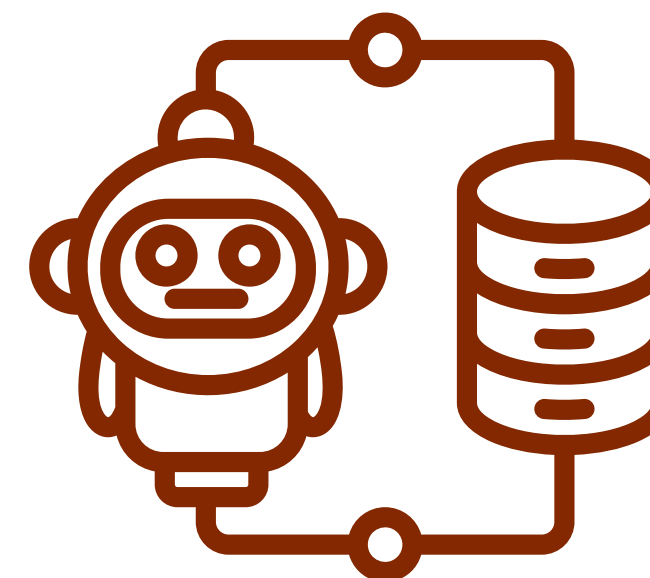

This is a digital ecosystem empowering youth in leadership, governance and decision-making. Objectives of the platform include:

Development of skills and opportunities, and sharing them on the platform.

Promote Inclusive Governance and civic advocacy

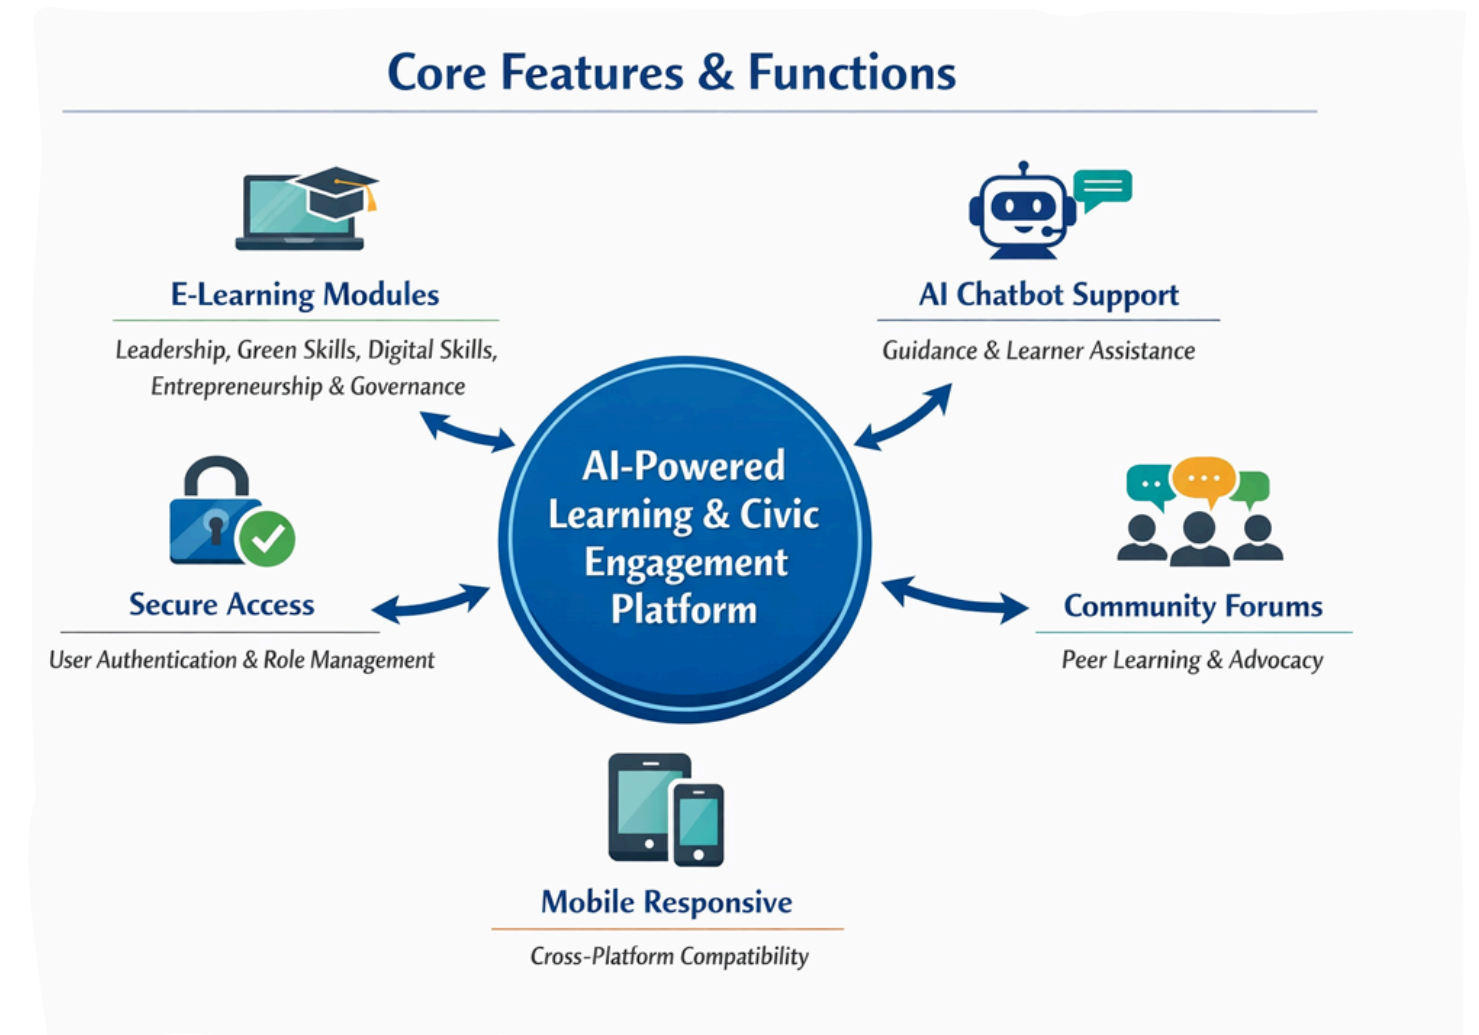

Leverage AI & Data driven insights

Kiongozi Platform

Screenshot of the Kiongozi platform

AI & Drone-Powered Environmental Solutions

AFOSI uses AI-driven drones for mapping illegal waste, precision agriculture and identifying mosquito breeding sites boosting environmental monitoring, disease control, agricultural productivity and creating green jobs for youth.

Flarehub- Startup Incubation & Innovation Platform

Flarehub is a centralized incubation and innovation platform empowering social enterprises and early-stage startups with mentorship, resources and access to funding.

Who It Serves

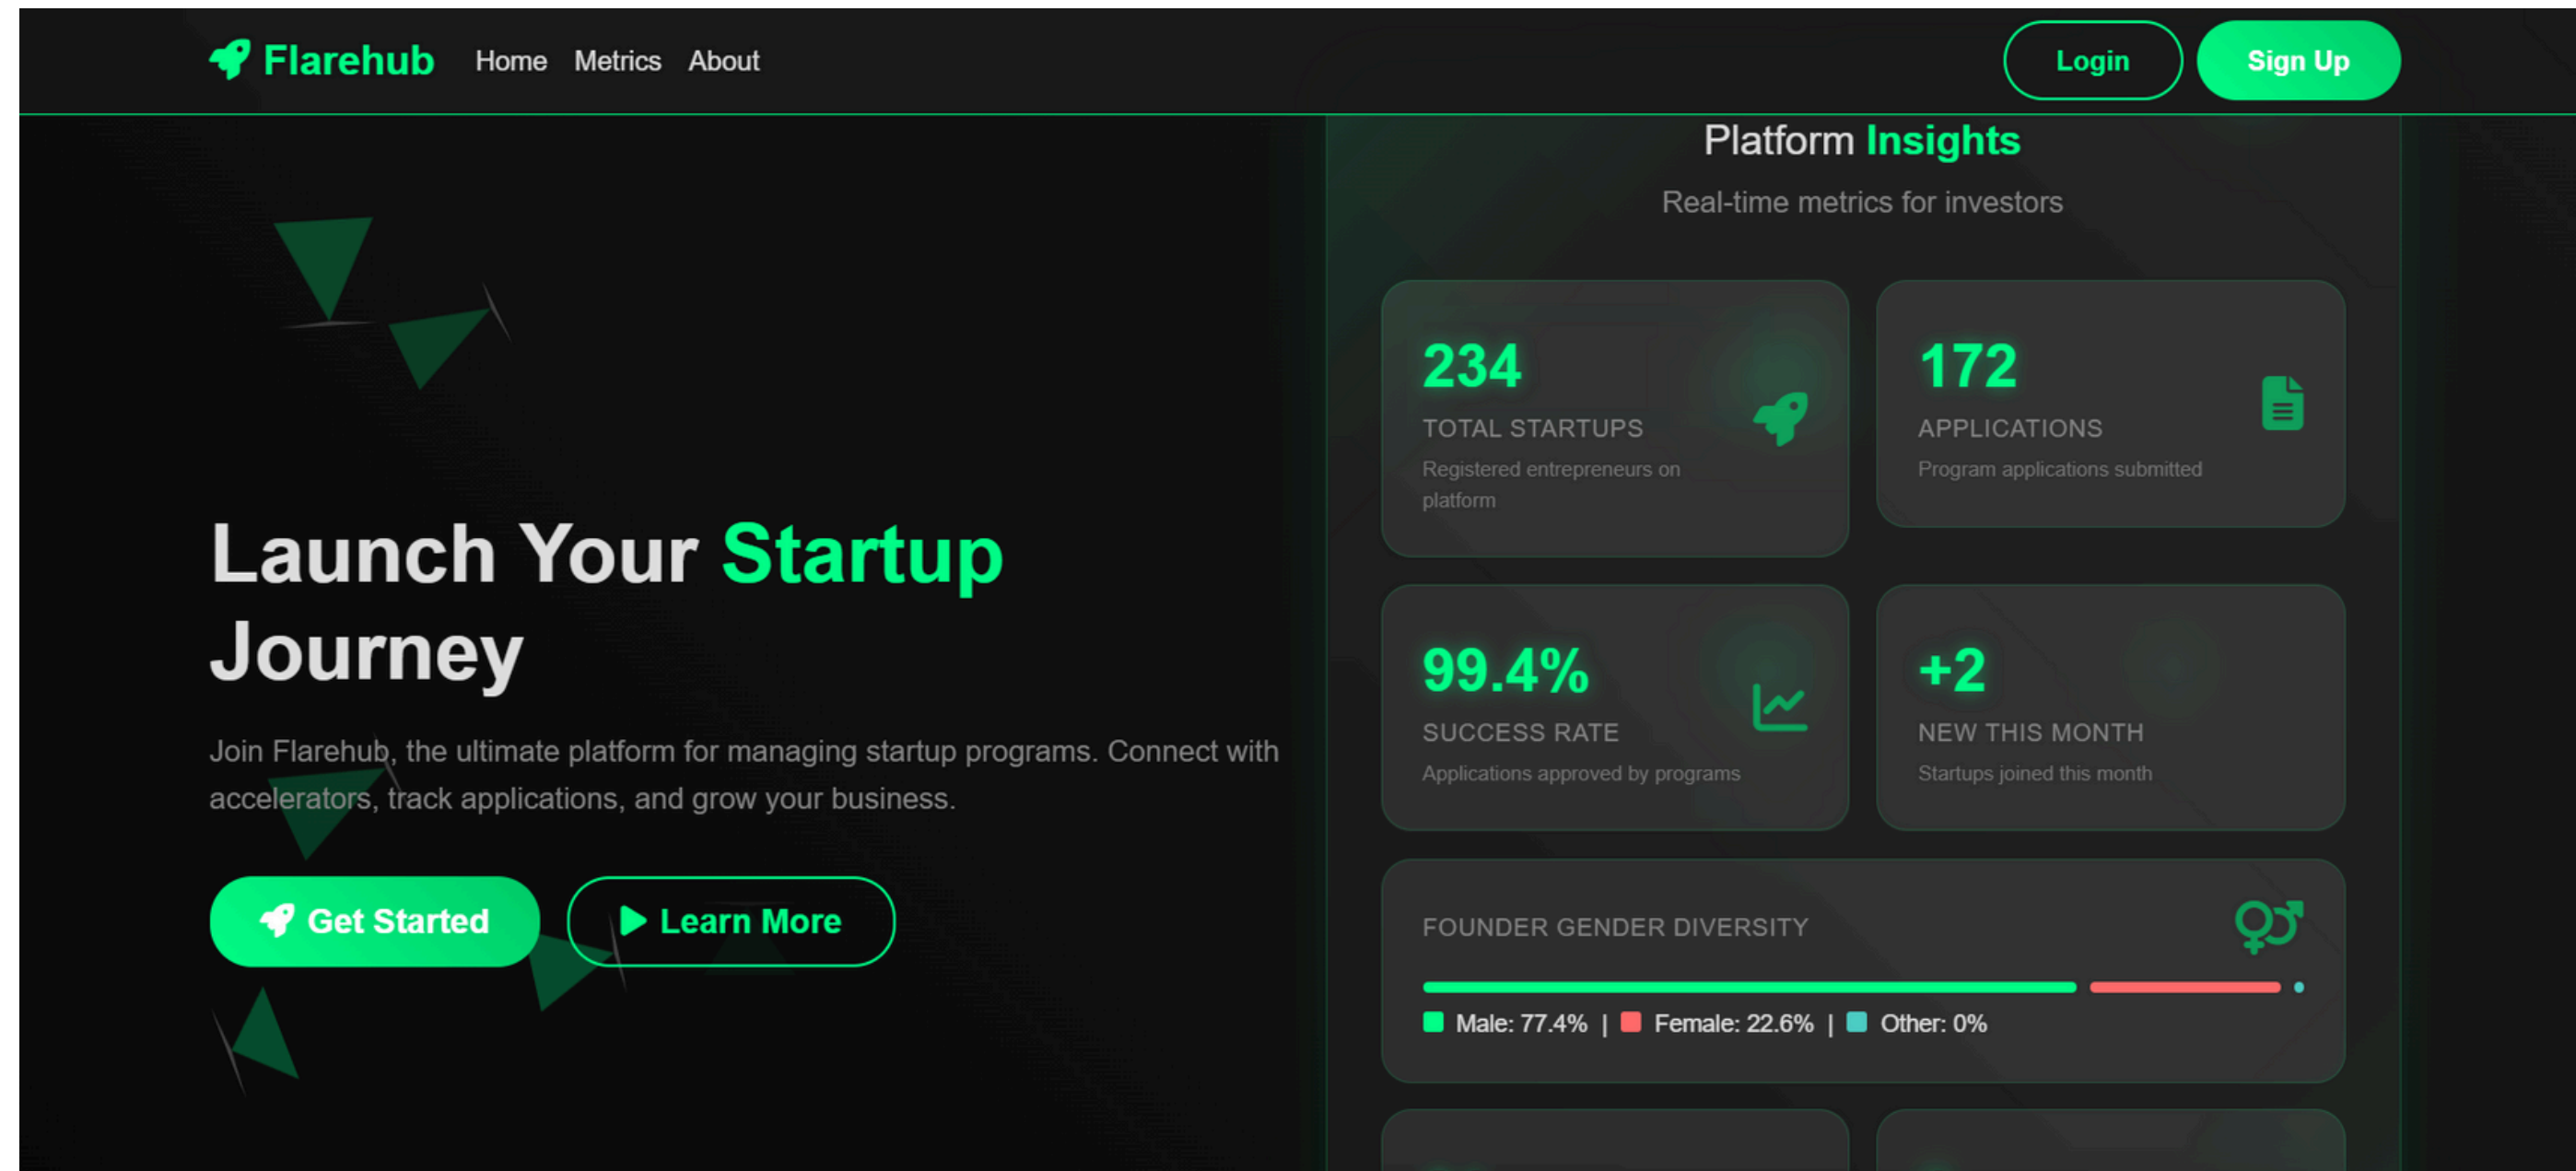

- Innovators: Grow their ideas
- Mentors: Share expertise
- Investors: Fund impact-driven solutions

How It Works

- Applications: Easy profile, metrics and document tracking
- Support: Mentoring, peer circles, webinars & workshops

Flarehub has supported the implementation of the BeGreen Africa program, the Youth Climate Innovation challenge (YCIC) to monitor the progress of entrepreneurs.

What It Is

The Kenya Youth Climate Hub (KYCH) is a tech-based platform that empowers young people to lead climate action, climate justice and green innovation in Kenya.

What It Solves

Many youth have climate ideas but lack skills, funding and exposure. KYCH connects them to training, mentorship, opportunities and networks to lead climate action and build green livelihoods.
